Spinal  
Evaluation &  
Rehabilitation

Dear Patient,

Thank you for choosing St. Cloud Chiropractic Clinic for your specialized scoliosis care. While all areas of scoliosis treatment have yet to be explored, we believe that the conventional medical solution of bracing and / or surgery are not always the most effective or beneficial approach to scoliosis correction.

At our Clinic, our goal is to work with you, giving you the knowledge and the tools to help you reduce and correct your scoliosis without the use of bracing or surgery. Because we have found that every scoliosis case is unique, we will take the time to understand you and the plan for your care on an individual basis.

Because this approach is new, some of the procedures may be considered experimental and may not be covered by your insurance company. In addition, the amount of time our staff will spend with you is considerably longer than spent on standard chiropractic care.

Waiver: I understand that some insurance companies may regulate and reduce payments to the St. Cloud Chiropractic Clinic. These reductions do not apply to the intensive, specialized scoliosis treatment. All reasonable and necessary fees determined by the Clinic must be paid by the patient or guardian. I agree to pay all charges for the scoliosis treatment and recommended durable goods (supplies) regardless of my or the Clinic's contract with the insurance company or HMO.

I have read and understand the above:

Patient Name: (please print) \_\_\_\_\_

Guardian Name: (please print) \_\_\_\_\_

Patient Signature or Guardian \_\_\_\_\_ Date \_\_\_\_\_
